

**Workshop on site in Copernicus Memorial Hospital in Lodz Comprehensive Cancer Center and
Traumatology, Poland
(Wojewódzkie Wielospecjalistyczne Centrum Onkologii i Traumatologii im. M. Kopernika,
Łódź Pabianicka 62)**

From	to	28.09.2023	29.09.2023 (access to scanner with isotopes)
		Topic	Topic
10:00	10:30	Cross calibration & NEMA IQ phantom filling can be done in a seminar room / lecture hall Practical filling without isotopes	Dose issues in PET/CT
10:30	11:00		Artifacts Quiz
11:00	11:30		
11:30	12:00		
12:00	11:30	lunch	lunch
12:30	13:00		
13:00	13:30		
13:30	14:00	Regular QC 1. Daily QC 2. Cross Calibration - filling the phantom - measurements - evaluation	Acceptance testing 1. Resolution - preparing a source - positioning / measurement 2. Sensitivity - filling the line source - measuring sensitivity
14:00	14:30		
14:30	15:00		
15:00	15:30		
15:30	16:00		
16:00	16:30	coffee break	coffee break
16:30	17:00	3. NEMA IQ - filling the phantom - measurements - evaluation	3. NEC - filling the line source - preparing the measurement (NO full measurement planed, just preparing the source with and start a measurement in case holders are available)
17:00	17:30		
17:30	18:00		Questions & Answers and Farewell
